## Touring exhibition: Regional Culture = European Culture Artworks from the participating project regions

Within the EU Project „Lucky Four Leaf Clover“, a collection of artworks from regional artists from the project region starts up a tour.

The project carries the name „Lucky Four Leaf Clover“. When the clover exceptionally has four leafs it means „luck“. That is to say, the four leaf clover is a symbol of luck. The context with the present EU project means that the accession of Croatia into the European Union expresses luck for Europe and the bordering member states Austria, Hungary and Slovenia. The task is to bring this to mind through the project. The stem of the leaf ultimately leads to a region of Bosnia-Herzegovina, a country of the Western Balkans with a special status, which has a special significance for peace in Europe and is additionally seeking accession into the European Union.

Also over regional art the mutual understanding of various European regions will be strengthened. To get to know the expressive power of the regional artists, an exhibition of regional artists' works from all project regions is compiled and presented at all project regions. Thereby shall be expressed how regional art is embedded in European art.
